Office Action Summary

Art Unit: 2661

1. Claim 37 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 37, line 6, "the interference level experienced" has no antecedent basis. The same is true with the term "the interference" recited in claim 37.

1½. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 30-39 are rejected under the judicially created doctrine of obviousness-type double patenting as being

Art Unit: 2661

unpatentable over claims 1-23 of U.S. Patent No. 6,144,652. Although the conflicting claims are not identical, they are not patentably distinct from each other because the applicant's claims merely broaden the scope of patent number 6,144,652, claims 1-23 by eliminating some features from the claims. It has been held that the omission of an element and its function is an obvious expedient if the remaining elements perform the same function as before. In re Karlson, 136 USPQ 184 (CCPA). Also note Ex parte Rainu, 168 USPQ 375 (Bd. App. 1969); omission of a reference element whose function is not needed would be obvious to one skilled in the art.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

Claims 30-32 and 34-37 are rejected under 35 U.S.C. 102(e) as being anticipated by Gardner et al. (5,857,147).

Gardner et al disclose a method comprising the step of:

receiving a request by a first terminal to establish a first communications link; and

Art Unit: 2661

allocating at least two temporal communication slots to first to terminal to support first communications link when interference caused by and interference experienced by the first communications link are acceptably low (see abstract).

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Anderson et al. (6,094,575) and Andos et al. (5,914,946) are cited to show a system which is considered pertinent to the claimed invention.

6. Any inquiry concerning this communication should be directed to Dang Ton at telephone number (703) 305-4739.
